(Text) An agent of the Yankee Central Intelligence Agency has been executed in Matanzas. The death sentence by firing squad passed by the Matanzas Revolutionary Tribunal on the counterrevolutionary leader Jorge Fundora Fernandez was carried out at about midnight last night. The sentence was confirmed by the higher court of appeals.

Fundora Fernandez had gone to the United States in November 1960. There he received a course in clandestine activities and terrorism. He returned to Cuba on 7 January this year under the false name of (Patricio?). He established contact with other agents of the Central Intelligence Agency and devoted himself to acts of terrorism and to preparing sabotage and attempts on the lives of figures of the government.

In the same trial 60 more conspiring worms, enemies of the homeland, were sentenced to various prison terms. Ten defendants were acquitted because their participation in the crimes against the security of the state was not proved.
